

Applied Math Teachers and CTE Instructors

I would like to encourage you to submit your registration for the February 21, 2020 WAMC Winter In-service at YV-Tech in Yakima. The lunch will be planned, prepared, and served by YV-Tech's Culinary Arts students. For that reason I need to know that you are coming so that we can feed you. The students and staff did an outstanding job last year.

Keep in mind that the Winter WAMC In-service is being offered for those of you that may have conflicts with the WAMC Fall and Spring In-services. Our intent at this in-service is to provide you with tools that will help you identify and document math in your existing CTE classes. Reinforcement of the math skills that your students are using every day in their CTE classes will help them with their math retention and also their math testing at the end of the year.

At this time we will have Applied Math lab presentations using Algebra I, Geometry, and Financial Algebra.

Lastly, our WAMC In-services will meet the requirements for STEM as stated in **RCW 28A.410.2212**. We are working in conjunction with Arlene Crum, OSPI Mathematics Director, concerning the joint efforts of the Mathematics Department and the Washington Applied Math Council in assisting all K-12 teachers.

All Registration Forms and the OSPI Applied Math CTE Funding Requirements are available on our web site: www.wa-appliedmath.org

Please note our new registration information. Please let the person(s) who will be sending in the registrations know of this new change and to not use the addresses and email addresses that they have used in the past.
