### Conference Objectives

ACTE's CareerTech VISION 2013 is the premiere conference for career and technical education (CTE) professionals. This conference focuses on CTE-specific topics. It highlights best-practices and innovative programming such as integrating academics into CTE programs, the use of technologies to enhance learning, ways to help students plan their secondary careers, and project-based learning. I (we) will learn more strategies for the integration of literacy and math standards into the CTE curriculum; embedding the Common Core State Standards using project-based learning; the utilization of technologies such as Web 2.0 tools to positively impact student achievement; and many others. ACTE's CareerTech Vision experts will give updates to keep educators informed about the legislative affairs that will have an impact on CTE funding. Attending the conference will also provide the participating staff with an opportunity to network with CTE instructors and administrators from across the nation, as well as gather new teaching techniques, project ideas, and the latest resources that will help improve the institution and its classrooms.

Suggestions for improving the conference:
- It was great!  It would be nice if there was a Washington social as I don't know a ton of people professionally from our state in ACTE.
